

# Bulk Transfer Interlock Unit 1

## Secure Transfer & Electronic Interlock

Bulk Transfer Units are designed for securely receiving or depositing bulky items such as parcels, cash cassettes or any item that requires transfer with security control.

It has the ability for Built-in speech to allow two way communication and interlock allowing only one door to be open at any one time.

The BTU-1 has a large capacity of 415mm x 285 x 590mm making it suitable for use within areas such as Banks, Cash Offices, Local Authority, Retail, Hospitals and any environment where secure transfer of bulky items is required.

The unit can be installed through internal or external walls of up to 495mm in thickness and can be supported on adjustable legs or storage pedestal as optional extras.

The operating panel can be mounted remotely from the unit, e.g. on a counter or on a wall if desired as an optional extra.

## Secure Transfer Operation

To operate, simply push the lock button which releases the electric solenoid latches to open either the inner or outer doors from the secure area.

An electronic interlock ensures that only one door can be opened at any one time. An emergency release is also provided to enable the inner door to be opened if required.

When open, the doors are strong enough to support heavy packages passing through the unit and a gas spring on each door dampens the opening of the door and assists closing.

The unit is designed to be fully serviceable in-situ without the need to remove it including all the electronics.

Speech Enhancement can be integrated with the BTU as shown to the left.
